

*We deliver agile software  
development teams as a service.*

**PORTFOLIO**

# OMNILIFE

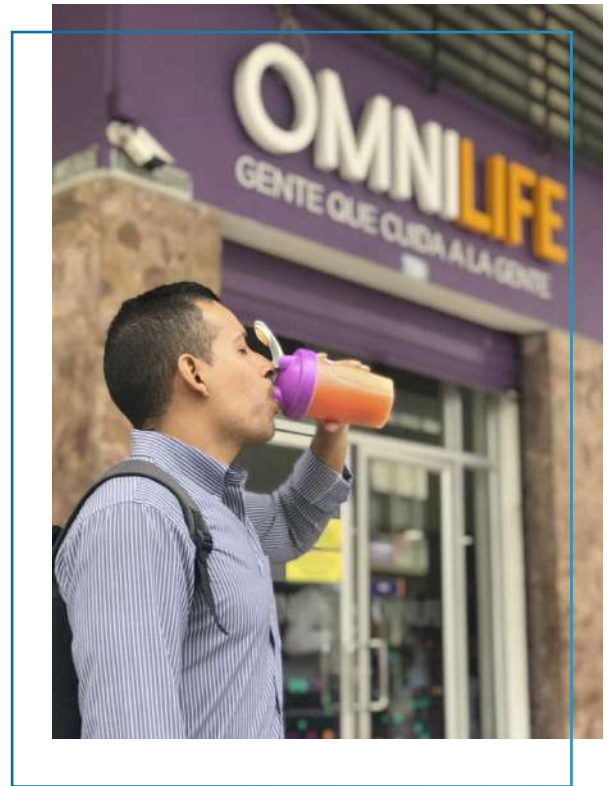

GENTE QUE CUIDA A LA GENTE

**Omnilife** is a Mexico-based company and the largest in the world that develops high-quality dietary supplements, helping thousands of people to maintain or improve their health.

## SOLUTION:

We designed and implemented a product management app for the product display centers located in Mexico, Cancun, and Guadalajara.

The previously mentioned app, developed with Android, is capable of showing information between different monitors consecutively with a command from a tablet. The user selects the wanted product from the device and the monitors display different graphic elements: the first monitor shows a picture of the chosen product, the second one a small description and the third one an animation of the exact part of the body which will be benefited.

# MANIFEST OF AGILE DEVELOPMENT

---

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

**Individuals and interactions** over processes and tools.

**Working software** over comprehensive documentation.

**Customer collaboration** over contract negotiation.

**Responding to change** over following a plan.

That is, while there is value in the items on the right, we value the items on the left more.
